+234 813 250 2142 emmanuel14samuel@gmail.com Portfolio

SUMMARY

Product and UI/UX Designer with experience in website and digital product design, SEO, website testing, graphic design, AI-assisted workflows, and customer-facing services. Skilled in Figma, prompt engineering, HTML/CSS, WordPress SEO, generative AI tools, and rapid prototyping, with foundational knowledge of machine learning and practical exposure to AI model training.

EXPERIENCE

Product Designer

Bizedge

Sep 2024 - Present Lagos, Nigeria

- Design digital experiences for a training platform focused on business skills and professional development.
- Create interface concepts, user flows, wireframes, and prototypes to improve usability and learning experiences.
- Translate product requirements into clear, intuitive interfaces using user-centred design principles.

Product Designer

Tolkabis Travels & Tours

Jan 2021 - Present Abuja, Nigeria

- Designed the company website to communicate travel services clearly and make information easier for prospective customers to access.
- Created customer-focused web experiences that help users explore services and initiate travel bookings.

Website Designer & SEO Specialist

Malton Technologies

Jan 2025 - Jul 2025

- Designed and maintained website experiences aligned with company objectives and user needs.
- Handled on-page SEO, including page structure, metadata, content organization, and search visibility improvements.
- Reviewed website usability and presentation to improve the overall customer experience.

Freelance Website Designer — E-commerce Client

Aug 2026 - Sep 2026

- Designed a responsive e-commerce website around the client's business, product, and customer requirements.
- Structured product, navigation, and conversion-focused pages to create a clear and intuitive shopping experience.
- Worked directly with the client to translate business requirements into a functional digital experience.

EDUCATION

B.Sc. Computer Science

Babcock University, Nigeria

2022 - 2026

PROJECTS

AI Model Training — Rice Disease Prediction

2026

Contributed to the training workflow of an ML model predicting rice plant diseases, gaining hands-on exposure to dataset prep and AI-training activities.

Website UX & Functionality Testing — Beasmar.com

2026

Tested website functionality to identify usability issues and broken interactions, then documented findings to improve the user experience.

Church Graphic Designer

2026

Designed promotional flyers and visual materials for church programmes and events, translating themes into engaging compositions.
